

Bring Back

The simple
things in life

In the Clinic

MyOnyx 4-Channel encoder is a complete solution for SEMG Biofeedback and Electrostimulation.

Design and functionality combined in just the right proportions.

U-Control® Home Trainer allows your clients to do pelvic floor biofeedback in the privacy of their own homes and is perfect for clients who want to accelerate their rehabilitation with additional training sessions or to periodically reinforce their successful clinical training at home.

At Home

Rectal STIM Sensor

Vaginal STIM Sensor

MyOnyx 4-Channel Encoder

- Mobile app and PC software to extend functionality
- Enhances clinical training efficacy

Rectal Sensor

Vaginal Sensor

U-Control Home Trainer

- Enhances clinical training efficacy
- Train above or behold threshold with audio visual feedback
- Simple to use and effective

CLIENT BENEFITS

Provide your clients with on-the-fly instruction with immediate real-time feedback. Help your clients gain muscle awareness from the first training session. As treatment progresses, you will be able to challenge them to reach deeper levels of muscle control. As an added benefit, you will receive objective and measureable training data.

All of this means enhanced training sessions in your clinic and at home for your clients.

Follow Us

AT THE END OF THE DAY

It is about your clients learning to control their pelvic floor muscles, and enhancing their confidence that they won't have an accident in public. Their recovery restores their freedom to do the things they love, whether it be venturing out with family and friends, starting a new exercise program, or just increasing their happiness in getting out into the world
